

Astrological and Ray Cycles in History

The author always endeavours to make practical this sometimes very abstruse science, hence there are many references to current world events such as the Japanese Tsunami, the Chilean Earthquake, World Kalachakra, Occupy Wall Street, the world financial crisis, the Wikileaks affair or the blending of races and cultures. There is a large section of essays on the United States of America. The five planetary chakras is another subject that is explored in-depth, including the major centres in the USA. Likewise the destiny of South America and the Sixth Rootrace is investigated, with its connection to the Mayans, 2012 and the planetary centre we call Shamballa.
